# Course: “ReADY Request Certification”

## Prerequisites:

Attendees should have a basic understanding of AiM work management.

## Course Description:

Are you looking to leverage the power of ReADY Request to streamline business processes and improve communications within your organization? Then this immersive training course may be just what your ReADY Request administrator needs. We will show how to configure ReADY Request to automate more and more of your facilities processes. Attendees will also learn how to design request forms using all the capabilities of ReADY Request, and to design workflows that optimize the process for all those involved.

After training, attendees will take the AssetWorks ReADY Request Administration Assessment, which consists of multiple-choice questions and a form design exercise. Passing the assessment and receiving the AssetWorks ReADY Request Administration Certification demonstrates that an administrator has a clearly defined standard of knowledge and the skills required to automate business processes using ReADY Request.
