

Motorpool provides visibility to accessible vehicles in a visual “Gantt-like” chart to quickly make decisions. Integrated O&M offers Motor Pool managers the ability to schedule vehicle maintenance or other assets without the need for another system. Integrated O&M also offers these managers the ability to associate costs to a job, if needed.

Your Challenges

- Rental costs of assets are excluded from job cost and therefore not recovered if the work is billable
- Lack of transparency into vehicle availability and utilization potentially causes unwanted delays for requestors and customer dissatisfaction
- Inability to link motor pool operations to preventative maintenance procedures leads to potential risks to vehicle users and opens to organization up to liability

What’s in it for you?

- Moto pool managers gain visibility into vehicle accessibility through a visual resource calendar to quickly make decisions on reservations
- Integrated operations and maintenance enables motor pool managers to schedule vehicle and supporting asset maintenance without the need for another system
- Integrated operations and maintenance also enables motor pool managers to easily associate costs to a job if needed

What You Get

- Vehicle Asset Profile
- Vehicle Attribute Tracking
- Vehicle Availability
- Integration to Operations and Maintenance Vehicle Maintenance
- Rental Request and Reservation by Employee, Contractor Contact or Organization
- Optionally Link Cost to Jobs

Motor Pool

As part of a broader Integrated Workplace Management System (IWMS), Motor Pool is seamlessly integrated with an extensive range of facilities management tools under a single, unified software platform.

The five pillars of AiM IWMS:

- Real Estate and Property Management
- Space Management
- Operations and Maintenance
- Capital Planning and Project Management
- Energy Management
