

Space Management

AiM Space Management software provides accurate data to pinpoint the total cost of owned and leased space across an organization. AiM supports metrics that enable you to compare your organization to similar institutions based on established standards, and you can accurately measure space and accurately track utilization enterprise-wide.

Your Challenges

- No consolidated listing of properties, buildings and assets
- No trusted Square footage values for reporting and forecasting
- Contact information is not readily available causing delays in emergency situations

What's in it for you?

- If you're struggling to aggregate data from multiple information silos, AiM centralizes all property, building and asset data for you—this data becomes the foundation of your Integrated Workplace Management System (IWMS)
- You can integrate CAD so your space planners can easily and centrally maintain square footage information to ensure accurate reporting for everyone
- You can link contact information in AiM for anytime access and to pro-actively notify people of upcoming significant event like shutdowns or emergency tests

What You Get

- Property Management
- Asset Management
- Human Resources
- Time Attendance
- Content/Document Management

As part of a broader Integrated Workplace Management System (IWMS), Space Management is seamlessly integrated with an extensive range of facilities management tools under a single, unified software platform.

The five pillars of AiM IWMS:

- Real Estate and Property Management
- Space Management
- Operations and Maintenance
- Capital Planning and Project Management
- Energy Management
