

Go CPPM

Mobility is Life

Go CPPM is an integrated iOS device application that provides project managers the precise functionality they need in the field, such as viewing and editing project details, opening related work orders, adding photos and documents, and performing inspections that can auto-generate corresponding remedial actions.

Solve Problems

- Paper based issue tracking
- Manual work authorizations and assignment

A Unique Approach

A complete mobile CPPM solution that not only enables mobile access to view, track and act on any issue, but additionally customizable user-defined templates enable project-based field and safety inspections in a timely paperless manner.

Key Benefits

- Connectivity directly into your AiM system improves real-time project data access
- Electronic signatures for control
- Improved reporting and identification of open issues
- Reduce paperwork and improve accuracy
- Improve operational efficiencies
- Track and act on field issues and safety inspections.

What You Get

Go CPPM
Track and Act on Field Issues
Mobile Access to view Project information in the field actions.
Connect and contact key contacts via text, email or phone
Perform Project-based Field and Safety Inspections
Easily collect project notes, descriptions, photos and more directly in the mobile app

Go CPPM

How It Works

	Direction	Other Product	Transaction Types
Go CPPM	To	Go Asset Management	Display Asset Details for Capital Project

Integral To:

Mobile Productivity (for customers that have CPPM)

Why AssetWorks

A leader in Integrated Workplace Management Software (IWMS), AssetWorks provides a single, unified platform for all of your facility management needs. A veteran team with 25+ years of domain experience, we are dedicated to continued innovation and constantly listening to your feedback and ideas for improving our current products. At AssetWorks, we're more than just an IWMS solution; we're a family dedicated to the successful management of your campus or community.
