

## Go Purchasing

### Mobility is Life

Go Purchasing provides the staff in the field the ability to do real time requesting of parts, record in store purchasing transactions, and approvals, with offline capability. Whether the part is in the warehouse, in a vendor catalog, or on the internet, a Go Purchasing user can request the item they need straight from their iOS device in the field.

### Solve Problems

Without an integrated mobile solution and process maintenance teams regularly deal with incomplete or untimely purchase requests. As the inaccurate reports push through, management and supervisory teams have to reconcile inaccurate or incomplete purchase reports. These delays impact customer service and timely resolution of work orders.

### A Unique Approach

AssetWorks is the only provider of a Purchasing Request application that enables teams to separate and control the workflow for requesting materials directly from an iOS mobile device. Automatic data synchronization allows transactions to be easily tracked and approved through the AiM system. Rapidly request and order parts assigned to an asset using QR codes, barcodes or the embedded search tool.

#### Key Benefits

- Connectivity directly into your AiM system improves real-time data capture.
- Reduce paperwork and improve accuracy.
- Improve operational efficiencies.
- Request parts, including catalog and non-stock parts, from the field.
- Rapidly order parts assigned to an asset.
- Request parts using QR or Barcode scanning.
- Easily purchase parts directly from a vendor.
- View status of prior requests and purchases and copy those transactions.
- Get notified when requests are fulfilled.
- Get notified when POs and invoices need your approval.
- Approve Purchase Orders and Invoices instantly.

# Go Purchasing

## How It Works

	Direction	Other Product	Transaction Types
Go Purchasing	From	Go Receiving	Purchase Receive Notification
	From	Go Work Management	- Purchase Request for Phase - Spot Purchase for Phase
	From	Go Inventory	Notification inventory request is ready for counter release

## What You Get

Go Purchasing
Mobile access to Request, Purchase and Approve parts for work orders
Receive audio and banner style status notifications for inventory and actions.
Monitor and track request activity

## Integral To:

Go Mobile Productivity      Asset Inventory and Capital Budgeting

### Why AssetWorks

A leader in Integrated Workplace Management Software (IWMS), AssetWorks provides a single, unified platform for all of your facility management needs. A veteran team with 25+ years of domain experience, we are dedicated to continued innovation and constantly listening to your feedback and ideas for improving our current products. At AssetWorks, we're more than just an IWMS solution; we're a family dedicated to the successful management of your campus or community.
