AssetWORKS

Go Receiving

Mobility is Life

Go Receiving compliments and extends the back office receiving capabilities of AiM by providing employees on the receiving dock precise functionality they need in the field, such as sign-for-receive, scan to disburse, and reject shipments with photo documentation.

Solve Problems

Utilizing a paper based intermediary documentation process, your operation team struggles continuously to capture the value of your purchasing and receiving system because it isn't accessible where you need it.   Though your robust workflows may be focused on the financial transactions they don't always capture the matching physical transaction.

A Unique Approach

AssetWorks' Go Receiving application enables teams to control the workflow for receiving materials and supplies conveniently and easily from an iOS mobile device. Automatic data syncing allows transactions to be easily tracked and approved through the AiM system.
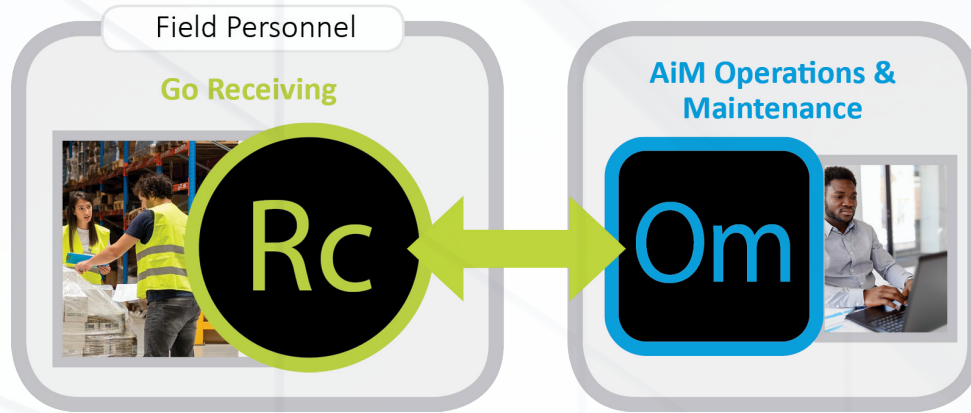

Key Benefits

- Connectivity directly into your AiM system improves real-time data capture.
- Reduce paperwork and improve accuracy
- Improve operational efficiencies

- View orders by vendor, or scan incoming packages for rapid identification
- Accurately track received items
- Reject unsuitable items and document with photos
- Instantly disburse received items, or...
- Scan a Go WO, Phase, Capital Project, or Warehouse to disburse appropriate items to the requestor
- Reverse Disburse items by Work Order, Phase, CP, or Warehouse
- Electronic signature capture for transactions

Go Receiving

How It Works

Field Personnel

Go Receiving

AiM Operations & Maintenance

Rc ⟷ Om

	Direction	Other Product	Transaction Types
Go Receiving	To	Go Purchasing	Purchase Receive notification
	From	Go Inventory	QR code to disburse into inventory
	From	Go Work Management	QR code to disburse to a phase

What You Get

Go Receiving
Access Vendor complete data to review PO's and receive inventory.
