

Hosting Services

Managed hosting services are a great way for organizations to outsource costly computer infrastructure, monitoring, and maintenance to providers that have the right people on staff. FacilityForce hosting services leverage a world-class enterprise architecture, ensure security and uptime, and provide unparalleled application expertise ...at a cost that would be hard to beat internally.

Your Challenges:

- Need specialized, dedicated IT support
- Requires hardware and infrastructure capital investment
- No uptime guarantees
- In-house solutions more prone to data loss in emergencies
- Endless server patches, updates, compatibility issues
- With so many choices, can be difficult to decide on best solution when building your own
- Technology changes so rapidly it can be hard to stay on top of the latest
- Responsible for your own backups, updates and routine maintenance to ensure the entire ecosystem runs smoothly
- Total Cost of Ownership (TCO) can never truly be nailed down

FacilityForce Hosting Solution:

- Infrastructure spin up time is instant compared to on premises
- Software is kept up-to-date for you
- Backups and disaster recovery is automated
- Managed IDS/IPS (Intrusion Detection & Prevention Systems) are in place
- IT resources with Operate expertise are ready to serve you
- TCO is a known entity in Hosted/SaaS that can be forecasted and budgeted
