- *Asset Location Management (GIS)*

Facilities Resource Planning Software (FRP)

Facilities Resource Planning (FRP) is a best of breed full lifecycle Facility Management (FM) software solution offered as an out of the box, off the shelf, unified platform for government organizations of all specialties and sizes.

FacilityForce's FRP removes any confusion surrounding how to best address current and future government organizational challenges. Siloed approaches via CMMS, CAFM, CPM, IWMS, or EAM solutions cost organizations time and money with unrealized challenges that come along with disparate systems.

Who is FacilityForce?

Although FacilityForce is a new name in the software world, we're actually a veteran player.

Created specifically to address the ongoing challenges government entities face today, FacilityForce was carved out of AssetWorks Facilities, a software developer with a rich history dating back to 1991 (30+ years ago).

AssetWorks Facilities has helped public sector organizations since its inception, and while AssetWorks Facilities will continue to serve the education market, FacilityForce will now serve government organization. AssetWorks Facilities and FacilityForce will remain sister business units within Constellation Software Inc., a conglomerate with a broad portfolio of vertically oriented software businesses that build mission-critical solutions for their customers.

Organizations with a significant investment in facilities and assets depend on FacilityForce's comprehensive soft-ware solutions to drive efficiencies in operations and maintenance, space planning and utilization, strategic planning and capital improvements, real estate and lease management, as well as energy and utilities.
